

HELVETIA GROUP OPEN-SPACE

Basel, Switzerland. 2013- 2014

The key objectives for the interior planning of the Helvetia Group headquarters at Steinengraben, Basel were in the users strategic standards of increasing flexibility, densification and efficiency - resulting in the newly created "open-space office" for 260 employees, finished with a delicate integration of modern art. The open-spaces promote communicative and efficient workplaces, offering precisely defined meeting zones for formal or informal needs. The interior design encourages mobility and integrates offbeat zones as think tanks, coffee corners, lounge areas, multifunction and restaurant spaces into a light, diverse, flexible and open-floor plan.
