

# SCHOOL HOUSE DE WETTE

Building & Traffic Department, Basel City

Built in 1903 by Emanuel La Roche and Fritz Stehlin De Wette School was carefully renovated in 2014 until 2015. The listed building required a cautious approach with the existing buildings. As much components as possible have been reconstructed or brought to the original state such as the windows. The entire house technology was renewed, earthquake reinforcements, handicapped accessibility, fire protection measures and acoustic improvements were made.
